

EKO Energy is proud to declare that the Sandhurst community has now officially made the switch to solar power!

There is still time for you to join the Sandhurst EKO Community and protect yourself from soaring electricity costs as well as reducing your carbon emissions.

38% of your solar power is made over summer. Get in now to make the most of the savings.

- Get a minimum of \$5,320 in government incentives off the cost of your system.
- Cut your electricity bill and even make money by taking advantage of the State Government's Feed in Tariff.
- Quality range of products including our own EKO brand high-grade mono crystalline panels, SilexSolar Australian made panels and a new Electronic Inverter – slim line and noiseless.
- Quality, heavy-duty rails and brackets, with quality German cabling.
- Stock available for prompt installation.

And for a limited time Sandhurst Residents who proceed with an installation will also receive a FREE Home Sustainability Assessment to learn how they can save even more money and reduce their greenhouse gas emissions.

Why did Sandhurst choose to use EKO Energy?

- Proven track record with thousands of satisfied customers in communities all across Victoria.
- We offer a free inspection and quotation with no cost or obligation.
- We use a community based, bulk buying approach to save costs.
- EKO Ezi-pay NO INTEREST EVER repayment option.
- Our components comply with Australian Standards and our panels come with a 25 year warranty.
- Quality range of products including our own EKO brand and SilexSolar Australian made Panels.
- Fully Australian owned and operated company.

"We are thoroughly committed to this initiative and really hope that you too can see the enormous benefits of going solar." -Julian Murray, General Manager Sandhurst Club
