28 April 2009

Australia's First Fibre to the Home Suburb Sandhurst part of International Conference

[The Fibre to the Home](#) (FTTH) Council Asia Pacific Annual Conference & Exhibition 2009 – "See The Light: Fibre Foundations for the Digital Economy" will use [Sandhurst](#) a privately developed suburb in south east Melbourne to highlight the advantages of [FIBRE TO THE HOME](#).

To be opened by the Hon. Stephen Conroy, Australian Federal Minister for Broadband, Communications and the Digital Economy, the Conference **19 -21 May 2009, Melbourne**, will highlight the latest trends in Fibre To The Home (FTTH) in the Asia Pacific region and wider geographical areas.

International delegates from the Conference on the 21st May will tour the multi award winning golfing residential suburb of Sandhurst developed by Victorian based golfing residential specialists [Links Living Limited](#).

The network at Sandhurst developed by [PBN](#) deploys a complete access fibre-to-the-home (FTTH) solution. The advanced network topology provides true triple-play video, voice and data services, like internet, VOIP and television.

Stephen Head Managing Director of Links Living said, planning for the ultra hi speed optic fibre system began five years ago as part of planning Sandhurst as the 'Suburb for the Future' which needed to have superior environmental and communication standards.

"Whilst there is much discussion about Fibre to the Home, Sandhurst is a perfect example of the benefits of the Ultra High Fibre networks."
